DETAILED ACTION

Request for Continued Examination

1. The request filed on 08/25/2008 for a RCE under 37 CFR 1.114 based on parent Application No. 10/609,002 is acceptable and a RCE has been established. An action on the RCE follows.

Claim Rejections - 35 USC § 112

The 35 U.S.C. 112, first paragraph rejection set forth in the office action dated September 24, 2007 has been withdrawn in light of the applicant's amendments to claim

1.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yeh et al. (Us 2002/0197763, newly cited) in view of Kishita et al. (EP 0616012, previously cited).

Yeh discloses a method for adhering a coating 72 of a polymer, metal, metalloid oxide or fluorinated derivative thereof to a surface of a dielectric layer or passivation layer 70 of a device produced in a CMOS process (figures 7 and 8; paragraphs 9, 10, 15 and 16). It is unclear if Yeh discloses application of an adhesion promoter wherein said adhesion promoter comprises a hybrid organic-inorganic material which is partially

Art Unit: 1791

or fully fluorinated. Kishita discloses a method of applying a fluorinated hybrid organic-inorganic material containing silicon to the surface of an electronic substrate for the purpose of promoting adhesion between said electronic substrate and another surface. Kishita further discloses that a fluorinated hybrid organic-inorganic material containing silicon has excellent adhesion promoting properties, especially when applied to electrical surfaces (abstract, page 2). At the time of the invention it would have been obvious to a person of ordinary skill in the art to apply Kishita's adhesion promoting layer to the dielectric layer of Yeh as taught by Kishita above. Such a modification to Yeh's method would improve the bond between Yeh's dielectric layer surface and coating.

Response to Arguments

4. Applicant's arguments with respect to claims 1 and 2 have been considered but are moot in view of the new ground(s) of rejection.
